Visalia, CA 93291

Actionrev®

Rebuilding almost anything from a watch to a ship with Actionrev on demand cloud software.

Rebuild, Repair, Service and Sell Online.

Action Multi Location Work Flow

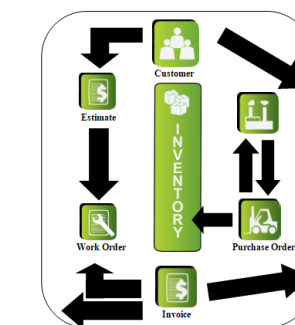

Customer Portal

Actionrev allows a user to assign a Login and Password to each of their customers. Each customer can log in and see that customer's work in progress and all of that customer's service history invoice by invoice. Actionrev tracks the past work done on equipment and/ or a serial number component. The user can use this information to scheduled future periodic maintenances (PM's).

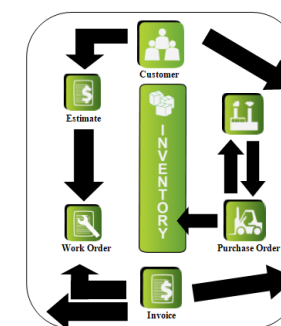

Manufacture or Distributor

Unlimited OEMs and/or Distributors

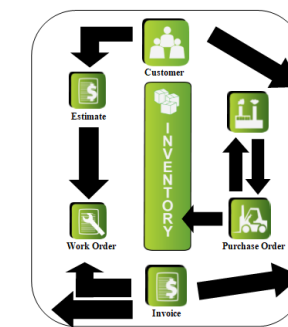

Industry Portal

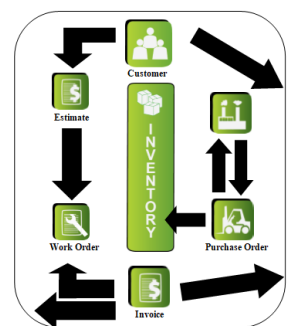

Dealers #1

Dealers #2

Dealers #3

Up to 200 dealers

Enterprise Solutions

Our current client base would like to create a Business to Business (B to B) integrated computer system with a Distributor or OEM (Original Equipment Manufacturer). Linking a Distributor or OEM to Dealers would benefit all.

The functionality of purchasing, item availability, and having current pricing is of importance to Dealers. Dealers would have current pricing of parts, availability of parts, Exchange prices, Core Charges, package quantities, and can seamlessly send Purchase Orders in real-time. A Dealers pricing would be protected and only viewable by that Dealer. All other information regarding customer records, past sales history, and the production of rebuilding is information the dealer regards as proprietary and must remain confidential to the Dealer. By creating a buffer, we fulfill our fiduciary obligation to the dealer. The dealer is assured all proprietary data will be kept confidential.

Distributors or OEMs would benefit because they would have the ability to receive a Purchase Order in real-time that can set aside items from inventory availability. This would eliminate incoming faxes and the labor of transcribing a faxed Purchase order into their inventory system. Distributors can also show when items have been shipped and give tracking information to their Dealers.

Our system is a multi-location, multi-department system. If Dealers wish to share inventory information with other Dealers they can do so. Currently, we allow all users of our software to share individual item inventory availability with the entire group of dealers but not any other information. The ability to share inventory information, including rebuild/exchange inventory, with all the members of the group is a very powerful way of collaborating with others and at the same time maintaining their proprietary information.

Modal Software can tailor a software system for any OEM or Distributor that would consist of one cloud-based database for the OEM and/or Distributor. This system would come with one website. This corporate website would have a login for as many Dealers as necessary. Each location would have all activity for Purchasing, Estimates, Work Orders, Invoices and equipment tracking in the database. Each function would have a search field that can narrow the search by location and department. Static inventory data would be universal to all locations and departments. Dynamic information (inventory qualities) would be displayed by location.

The Static inventory data would consist of the following:

1. Item Retail Pricing. Current retail per all items sold and purchased
2. Item Cost
3. Rebuilt item pricing
4. Core pricing
5. Package qualities
6. Assess to Purchase Orders (This will be created in the buffer as an Invoice to the client)
7. Item inventory would be as per the master item list in the clients and Manufacture's/Distributor database.

Dynamic data would include the quantities of each item ordered, shipped information, and any other data that would change as each order is processed.

Purchase Order numbering would be the sequential numbering per client's database and a sequential

Service Includes

True cloud based; AWS [Amazon Web Service] PC & Mac Browser, Desktop, Tablet, & Smartphone, B2B network world wide

Multi- Location & Multi- Department

Full inventory locator, building, aisle, rack, elevation & bin

Web connect to Quick Books, Pro or Enterprises

Average & Specific Identification Costing, serial numbers, tracking & rebuild, core tacking

GMROI: Gross Margin return on investment per inventory line item

My Core Rebuilds and Packaging

Jahan Farhang, Marketing and Software Support

Mr. Farhang has been involved with Modal Software and Actionrev.com since 2008. Jahan is involved with web design of Actionrev.com.

Chia, Quality Assurance and Software Support

Chia is our newest team member of Modal Software. She graduated from San Joaquin Valley College with an Associate Degree in Business Administration in 2015. She joined Ouzounian Corporation in 2016 as an Administrative Assistant. She was promoted to Modal Software in 2018 as our Software Support. She will be available for our clients to help them with any questions regarding Actionrev.

Corporation History

Modal Software Corporation is located in Visalia, California. We have fifteen years of database experience and a cloud-based system since 2007.

Actionrev has their I.P.P hosted by Heroku located in San Francisco, California.

Their database is hosted by Amazon located in Virginia. Our current lag time for a request and response is currently one and one half a seconds.

Member of:

Meet our Team

George Ouzounian, CEO of Modal Software and Ouzounian Corporation

Mr. Ouzounian graduated from Fresno State University with a Bachelor of Science degree in Accounting in 1971 and worked for a local CPA's firm from 1971 to 1975. Auditing cities, hospitals, school districts and preparing thousands of tax returns. After four years of public accounting, George joined his family's business Ouzounian Corporation. In 1992 George become a real estate broker licensed in California. George holds a California Real Estate Broker's license and currently practice as a commercial real estate broker in Tulare and Kings Counties.

In addition, Mr. Ouzounian owns and manages 45,000 square feet of retail and office space in Visalia, California. In 1999, George co-founded and is currently President of Modal Software Corporation. Modal provides a proprietary software application to companies nationally as a SaaS, (Software as a Service). Actionrev.com is a cloud-based database hosted by AWS, Amazon Web Services. Mr. Ouzounian is currently a board member and past chairmen of the Tulare Assessment Appeals Board, and Board member of the Visalia Public Cemetery District and past Board.

Reid Stephens, Vice President of Software Enhancements

Mr. Stephen graduated from St. Mary's College with a degree in Video Productions in 1995. He then joined his family's business located in Visalia, California. Mr. Reid and his family have developed a cloud-based database (SaaS) called Medical Billing Technologies. They process medical insurance claims on behalf of school districts in the State of California.

Frank West III, Chief Software Developer

Mr. West graduated from Fresno State University with a Bachelor of Science Degree in Computer Technology in 2001. After employment with major companies in the Fresno area, Mr. West became a freelance developer working on enterprise databases in the area of agricultural developing and enhancing Actionrev.com for approximately five years.

Jason Haury, Software Developer and Support

Mr. Haury holds a Masters of Science in Electrical Engineering and serves as system architect for ActionRev. After over a decade in the satellite communications industry, Mr. Haury freelances writing web back-end services and automation.

Richard Caetano, CEO of Akord Corporation

Mr. Caetano is the CEO of Akord Corporation (www.akord.com), a startup company located in France. Akord is in the process of creating a database using blockchain technology in the financial services industry. Mr. Caetano has been building applications and database projects since the early part of the century. He has created projects in the music industry, the film industry and was the original designer for Actionrev.com.
